

INDEX TO VOLUME III.

GENERAL ALPHABETICAL INDEX.

Entries from the Synopsis of Periodical Literature are indicated by S. (Synopsis); from the Analysis of Current Electrochemical United States Patents by A. (Analysis); from the Digest of Electrochemical United States Patents Prior to July, 1902, by D. (Digest); from Recent Metallurgical Patents by M. (Metallurgy). Illustrated articles are indicated by *.

The regular departments are found on the following pages:

Synopsis of Periodical Literature, 35, 78, 115, 155, 198, 234, 272, 311, 350, 394, 433, 473.

Analysis of Current Electrochemical Patents, 29, 71, 111, 153, 196, 227, 269, 307, 346, 391, 431, 470.

Digest of United States Patents Prior to July, 1902, 48, 88, 127, 164, 208, 246, 284, 322, 362, 406, 448, 482.

Recent Metallurgical Patents, 33, 75, 120, 158, 193, 242, 276, 315, 355, 393, 438, 476.

Notes on Electrochemistry and Metallurgy in Great Britain, 23, 69, 109, 151, 195, 233, 267, 304, 343, 366, 410, 452.

The serial of J. W. Richards on Metallurgical Calculations is found on the following pages: 103, 146, 186, 221, 261, 299, 338, 387, 427, 467.

A

- | | | | | | |
|--|-----------|--|-------------|---|---------------------|
| ABBE, P. O. | 482 | —Electrolytic deposition from mixed solutions. Jacobs | 250 | —Anode for rectifying alternating current. (See Rectifier, Electrolytic.) | |
| Abbe Engineering Co. Pebble tube mill. | 411 | —Muntz metal. Analysis | 93 | Aluminothermics. (See Thermit.) | |
| Abrasive fastened to metals. Case. (A.) | 115 | —Specific heats, latent heats | 301 | Alumina manufacture | 253 |
| Acetone for making iodoform. Roush.... | 333 | —Variation in the properties of Longmuir | 251 | —Miscellaneous | 30, 340, 406 |
| Acetylene from acetylene | 254 | —of copper. Refining. Beiz | 231 | Amalgams. Action on solutions. (S.)... | 81 |
| Acetylene | 254 | —Magnetic from non-magnetic metals. | | —of sodium. Schueller. (S.)..... | 39 |
| Acheson, E. G. Portrait..... | 41 | Heusler | 318 | American Chemical Society..... | 212 |
| Acheson Siloxicon Articles Co..... | 445 | Hadfield | 345 | —Buffalo meeting | 250 |
| Acid. Action on iron. Burgess..... | 332, 394 | (See also the different metals.) | 409 | American Coke & Gas Construction Co. | |
| —Containers of lead. Miller. (M.)..... | 243 | Alternating-current electrolysis | 37, 474 | —O'Brien roasting furnace..... | *201 |
| Acid pickle. Burgess | 332, 394 | —Brochet and Petit. (S.) | *327 | | |
| Agate shellac | 283 | —Le Blanc | 118 | | |
| Agitator. Berrigan. (M.) | 34 | —Le Blanc and Ruer. (S.)..... | | AMERICAN ELECTROCHEMICAL SOCIETY: | |
| —Hendryx. (A.) | 229 | Alternating current converted into direct with aluminium electrode. (See Rectifier, Electrolytic.) | | —52, 92, 132, 168, 213, 267, 288, 445, 481 | |
| —Brown. (M.) | *356 | | | —Boston Meeting..... | 129, 132, 165, *171 |
| —Stevens. (M.) | 194 | ALUMINIUM: | | —Bethlehem meeting..... | 323, 336, 363, *369 |
| —Devereux. (M.) | 159 | —Manufacture | 253 | —New York section | 52, 213 |
| —and filter. Robinson. (M.)..... | 194 | —Industry in 1904. (S.)..... | 394 | —New York section meeting at Electrical Testing Laboratories..... | 852 |
| —for electrolytic cells. Ashcroft. (A.) | *271 | —in Great Britain | 70, 233 | American Foundrymen's Association..... | 251 |
| Ainsworth & Co. Balance..... | *42, *206 | —Process. Betts. (A.) | 347 | American Institute of Mining Engineers. | 212 |
| —Multiple-ride carrier | *244 | —Blackmore. (A.) | 29, 36, 123 | Ammeters for electrolytic work. Addicks. | 382 |
| Air, nitric acid from. (See Discharges, Electric.) | | —Cowles, Mabery. (D.)..... | 123 | Ammonia. Produced by electrolysis. | |
| Air. Specific heat. (S.) | 437 | —Schwahn. (D.) | 362 | —Hoops. (A.) | 308 |
| Alkali. Electrolytic production of caustic. (See Sodium Chloride, Electrolysis.) | | —Stopper for electrolytic pots. Hall. (A.) | 347 | —Oxidation to nitrite. (S.)..... | 351 |
| Alkali and alkaline-earth metal hydrides. Machalske. (A.) | 391 | —Solder. Fortun & Temprun. (M.)... | 33 | —Effect on storage-battery electrolyte. (S.) | 362 |
| Alkali in China | 404 | —for brazing compound. Reynolds. (M.) | 76 | —In cyaniding cupriferous ores and tailings | 151 |
| Alkalinity in cyanide process..... | 256 | —for hardening iron. Ramon. (M.)... | 159 | —Liquid ammonia solutions. (S.)..... | 230 |
| Allis-Chalmers Co. Blast furnaces for lead and copper smelting..... | *442 | —Steels. (S.) | 240, 463 | Ammonium formate. Manufacture. Pauling. (A.) | 32 |
| —Blowing engine | 245 | —Alloys. Production of. Blackmore. (A.) | 229, (A.) | Anaconda Copper Mining Co. Baltimore laboratory. Keller | *329, *418 |
| —Hancock jig | 446 | —Zinc alloy. Prescott. (M.)..... | 120 | | |
| —Overstrom diagonal concentrating table | *318 | —Bronze. Production of. Willson. (D.) | 206 | ANALYSIS: | |
| —Pumping engines | 245 | —Cowles. (D.) | 128 | —Apparatus for works laboratories. Keller..... | *229, *418 |
| ALLOYS: | | —Bromide. Heat of solution in ethyl bromide | 179 | —Co-operative of copper slag. Smith. | |
| —of aluminium. Production. Blackmore. (A.) | 432 | —Plating on aluminium. (S.)..... | 177, 362 | —of refined copper. Heath. (S.)..... | 413, 456 |
| —Aluminium and zinc. Prescott. (M.) | 120 | —as reducing agent. (See Thermit.) | | —Chlorate. Conlern. (S.)..... | 436 |
| —of copper and bismuth. Hiorra. (S.) | 396 | —as reducing agent, combined with arc furnace. Watts | 372 | —Antimony. Low and Perkin. (S.)... | 285 |
| —of copper. Brasses. Guillet..... | 157 | —Electrolytic condenser | *172 | —Cobalt and nickel | 67, 70, 80 |
| | | —Electrolytic switch. Horry | 182 | —Muntz metal. Rhodin | *93 |
| | | —Cell for asymmetric shunt. Horry. (A.) | 196 | —Balanced electrodes. Gee. (S.)..... | 350 |

- Rotary anode and mercury cathode. Kollock and Smith. (S.)..... 395
 —with circulation of electrolyte. (S.)..... 80
 —by alternating currents. Brochet and Petit. (S.)..... 274
 —Ammonia in cyaniding cupriferous ores and tailings. Jarman and Breckton. (S.)..... 151
 Anilin black by electrolysis of a sodium salt. Ramage. (A.)..... 228
 Anode. For sodium chloride electrolysis. Briggs. (A.)..... 72
 —Insoluble with reciprocating motion. (A.)..... 471
 —of magnesium. Baborovsky. (S.)..... 474
 —Polarization of. Milner. (S.)..... 273
 Anode slime. Treatment of. Betts. *141, 235, 319
 —Kern. (A.)..... 471
 Anthracite coal, sources of..... 287
 Antimony. Electrometallurgy of. Betts. 310, 350
 —Electroanalysis. Low and Perkin. (S.)..... 395
 —Reaction in slime..... 143
 —Treatment of ores. MacArthur. (M.)..... 393
 Arc discharges. (See Discharges, Electric.)
 Arc. Electric. Whitney. (S.)..... 184
 Arc. Mercury. Weintraub. (S.)..... 184
 —at Elks' Carnival..... 429
 Arc. Metallic. Ladoff. (S.)..... 308, 342
 Arsenic. Reduction. Westman. (D.)..... 235
 —Yellow by arc. Stock and Siebert. (S.)..... 377
 —in pickling solutions. Burgess..... 143
 —Reaction in slime..... 143
 Assaying. (See also Analysis.)
 Assay furnace tools. Keller..... *118
 Atomic weights and electrochemical equivalents. Renterdahl..... 179
 Attraction. Molecular. Mills..... 37

B

- BACTERIA for modifying oils. Meusel. (A.)..... 349
 Bagg, J. H..... 362
 Baker, J. T., Chemical Co..... 47
 Balance. Ainsworth & Co..... *206
 Balance. Multiple-rod carrier. Ainsworth & Sons..... *244
 Balanced electrodes. Gee. (S.)..... 350
 Bancroft, W. D. Portrait..... 370
 Barium compounds. Production. Jacobs. (D.)..... 322
 —Chloride. Electrolysis of solid..... 99
 —Hydrate. Production of. Jahn. (A.)..... 284
 —Silicide. Jacobs. (D.)..... 326
 Barrel for chlorination. Jones. (M.)..... *121
 —Filter. Stolthoff. (M.)..... 445
 Barretter. Liquid. Patent..... 445
 Batteries. (See Storage Battery, Primary Battery, Standard Cell, Carbon Cell, Gas Battery.)
 Bauxite brick..... 43, 127
 Bauxite purification. Hall. (D.)..... 448
 Beakers. Handling. Keller..... *330
 Beaver Metallurgical Co..... 403
 Benzene series. Electrolytic oxidation. (S.)..... 352
 Bertuch & Co. Armored stoneware cocks and spigots..... *126
 —Stoneware apparatus..... 440
 Bethlehem Steel Co. plant..... 381
 Bibliography. Electrochemical. Classification. Voegel..... 107
 Bichromate of soda from leach liquor. Gibbs. (A.)..... 112
 Bichromates and chlorate. Gibbs. (A.)..... 432
 Bismuth. Reaction in Slime..... 143
 —and copper alloys. Hiorns. (S.)..... 47
 Bisulphide of carbon..... 47
 Blackwell, G. G..... 447, 452
 Blast furnace. (See Furnace. Metallurgical.)
 Blast. Hot. (See Furnace. Metallurgical Hot Blast.)
 Blast. Dry. (See Furnace. Metallurgical Dry Blast.)
 Bleaching. Electrolytic hypochlorite..... 470
 —Flour by electric discharges. Johnson. (A.)..... 232
 —with chlorine. Paramore. (A.)..... 232
 —(See also Sodium Chloride Electrolysis; Oxone, and Oxone.)
 Blowers, fan versus positive pressure. Field..... 251
 Blowing engine. Allis-Chalmers Co..... 245
 Boilers. Preventing formation of scale. Stewart. (A.)..... 115

BOOK REVIEWS:

- The Study of the Atom. By F. P. Venable..... 40
 —Modern Electroplating. By J. H. Van Horne..... 40
 —A Text-Book of Static Electricity. By H. Mason..... 40
 —Aluminium in Vegetable and Animal Products. By C. F. Langworthy P. T. Austin..... 40
 —Handbook of volumetric analysis. By F. Sutton..... 41
 —Outline of Siderology. Vol. III. By H. von Juener..... 85
 —Calendar for Electrochemists. By A. Neuburger..... 121

- Techno-chemical Analysis. By G. Lunge—A. I. Cohn..... 121
 —Polishing and plating of metals. By H. J. Hawkins..... 122
 —Yearbook of Electrochemistry. By H. Danneel..... 159
 —Electricity in Every-day Life. By E. J. Houston..... 200
 —Electric furnaces. By J. Wright..... 243
 —Theory of Lead Accumulator. By Dolezalek-von Ende..... 278
 —Magnetic alloys from non-magnetic metals. By F. Heusler..... 318
 —The electric furnace. By A. Minet..... 356
 —The electric furnaces. By J. Escard..... 356
 —The electric furnace. By Moissan-Mouillie..... 357
 —Transactions of the American Electrochemical Society. Vol. VII..... 400
 —Engineering Chemistry. By T. B. Stillman..... 439
 —Experimental electrochemistry. By N. M. Hopkins..... 477
 —The Copper Handbook. By H. J. Stevens..... 478
 —Elements of inorganic chemistry. By W. Ostwald..... 478
 Borehole. Deep. Surveying. Marriott..... 151
 Boron by electrolysis. Lyons and Broadwell. (A.)..... 228
 Boynton, H. C..... 49
 Brass. Made in electric furnace..... 83
 —works in Germany. (S.)..... 157
 —Guillet. (S.)..... 250
 —Deposition. Jacobs..... 76
 Brazing compound. Reynolds. (M.)..... 127
 Brick. Bauxite..... 43, 355
 Briquetting. (M.)..... 317
 —Baker and Hearne. (M.)..... 153
 —Gates..... 476
 —Groendal. (S.)..... 277
 —Moore and Haskett..... 17
 —Pohl; Koeneke; Furukawa. (M.)..... 77
 —Price. (M.)..... 77
 —Ronay. (M.)..... 77
 —Wedge. (M.)..... 81
 —Weiskopf. (S.)..... 274
 —Zeidler. (S.)..... 70
 British Aluminium Co..... 157
 Bromides. Electrolysis. (S.)..... 200
 Bromination of gold. (S.)..... 157
 Bromine. Solubility and potentials of..... 83
 Bronze works in Germany. (S.)..... 166
 By-products..... 208
 Byrnes & Townsend..... 208

C

- CALCIUM by electrolysis. Goodwin. (S.)..... 80
 Calcium potassium, sodium in voltage series. (S.)..... 351
 Calcium carbide. Industry. Marmier. (S.)..... 236
 —and acetylene industry..... 254
 —Production in electric furnace. (See Furnace, Electric, Production of calcium carbide.)
 —as explosive. (S.)..... 226
 Calcium cyanamide as fertilizer..... 28, 79, 117
 Calcium peroxide..... 255
 Calcium silicide. Jacobs. (D.)..... 284
 Calculations. Metallurgical. Richards..... 103, 146, 186, 221, 261, 290, 338, 387, 427, 463
 Caloric power of fuels..... 187
 Cambridge Scientific Instrument Co. Féry pyrometer..... *478
 Canadian engineer..... 267
 CARBON:
 —Articles, brushes, electrodes. Tone. (A.)..... *269
 —Changed to graphite. Acheson, Castner, Wing. (D.)..... 482
 —Electrode for sodium chloride electrolysis. Brigg. (A.)..... 72
 —Rods. Production of. Edison. (D.)..... *495
 —Tube furnaces. Hutton and Patterson. (S.)..... 38
 —Jones. (A.)..... *31
 —Dioxide. Specific heat. (S.)..... 437
 —Tetrachloride for extraction of oil..... 403
 —Tetrafluoride. Production of. Lyons and Broadwell. (A.)..... 228
 —(See also graphite.)
 Carbonate in caustic potash. Winteler..... 16
 Carbonsilicon. Potter..... *463
 Carborundum. Manufacture..... 253
 —Production of molded blocks, tubes. Bölling. (A.)..... 482
 —as refractory. Scott..... 140
 —as jacketing material for furnaces..... 456
 Card index. Electrochemical..... 107, 377
 Carhart, H. S..... 322
 Carnegie, A..... 127
 Castings repaired by thermit process. (See Thermit.)
 Cathode, revolving, with circulation. Harrison and Day. (A.)..... 308
 —Flora. (S.)..... 474
 Caustic potash from sulphate. Herold. (S.)..... 473
 —Content of carbonate. Winteler..... 16

- Caustic potash or soda. (See also Sodium Chloride, electrolysis.)
 Caustification of potassium sulphate. Herold. (S.)..... 473
 Cell. Electrolytic. Dion. (A.)..... 349
 —Recovery of zinc, magnesium. Decker. (A.)..... 308
 —Artificial circulation. Ashcroft. (A.)..... *271
 Centrifugal apparatus for electrolytic purposes. Hauser. (A.)..... 307
 Centrifugal machine of stoneware..... *440
 Centripact screen..... *124, *163
 Chalas, A..... 322
 Chandler, C. F..... 246
 Chemical and electrical energy. Haber..... 292
 Chemical elements. Genesis. Engle..... 240, 328
 Chemical equations..... 104
 Chemical power transmission..... 247
 Chemistry of electrochemistry. Bancroft..... 364, 370
 Chemist's hearth for laboratory..... *102
 China. Alkali in..... 404
 Chlorates by electrolysis..... 435
 —Coulern. (A.)..... 231
 —Corbin. (S.)..... 235
 —Sirk. (S.)..... 352
 —and bichromates. Gibbs. (A.)..... 432
 —Analysis. Conlern. (S.)..... 435
 Chlorides of alkalies. Electrolysis. (See Sodium Chloride. Electrolysis.)
 Chlorination process. (S.)..... 35 (S.), 79
 —Permanganate..... 70
 —Precipitation of gold. Jacobs. (A.)..... 231
 —versus cyanidation. (S.)..... 35, 79, 116
 —(S.)..... 200
 Chlorine. Atomic weight. (S.)..... 239
 —Bleaching. Paramore. (A.)..... 232
 —Electrolytic for making hydrochloric acid. Nagel..... *16
 —Chloro-electrolytic smelting. Cobel-dick..... 63
 —(See also Sodium Chloride. Electrolysis.)
 Chrome-vanadium steel. Heat treatment. 71
 Chromium, electrolytic. Carveth and Mott. (S.)..... 273
 —Carveth and Curry..... 176
 —Aschermann. (D.)..... 48
 —Removed from chromiferous iron ore. Campbell. (M.)..... 355
 Chromium silicide. Chaplet. (D.)..... 208
 Circuit breakers. Modern practice..... 405
 Classification for electrochemical bibliography. Voegel..... 107
 Clay. Semipermeable membranes. (S.)..... 475
 Coal in Great Britain..... 110
 Cobalt. Analysis..... 67, 70, 80
 Cock of stoneware..... *440
 Cocks and spigots. Armored stoneware. Bertuch & Co..... *126
 —Coke. Sources of..... 296
 —Coke oven. Waste heat from. (S.)..... 242
 Colby, E. A. Portrait..... 298
 Colloidal solution of tellurium. Mueller and Lucas. (S.)..... 474
 Colloids. Whitney..... 182
 —Franklin and Freudenberg..... 369
 Colorado Iron Works Co. Hot-blast smelting..... *400
 Columbia University..... 168
 Columium and tantalum. Smith and Hall. (S.)..... 395
 Combustion temperature..... 188
 Compounds and solutions. Kahlenberg..... 25
 Concentration processes..... 365
 —Concentrating plant. Green Mountain Mining & Milling Co..... *122
 —Diagonal table..... *318
 —Elmore oil..... 481
 —Electrostatic. Blake-Morscher..... *181
 —Magnetic. Campbell. (M.)..... 439
 —Languth. (M.)..... 439
 —Gold from sands. Lovett. (M.)..... 33
 —Weiss. (M.)..... 439
 —Wetherill. (M.)..... 439
 Condenser. Electrolytic..... *172
 Conduction in electrolytes. Richards..... 175
 Conductivity of copper. Effect of impurities. Addicks. (S.)..... 314
 —of dilute solutions. Goodwin and Haskell..... 37
 —of non-aqueous solutions. Jones and Carroll. (S.)..... 38
 Congress. Sixth international of applied chemistry..... 445
 Consolidation of metallurgical experience. 51
 Contact process of making sulphuric acid. 469
 Containers of lead for acids. Miller. (M.)..... 243
 Continuous versus intermittent process..... 90
 Converting alternating into direct current. (See Rectifier. Electrolytic.)
 Cooling by water. Furnaces..... 450
 Cooper, Chas., & Co..... 207

COPPER:

- Analysis. Heath. (S.)..... 237
 —Alloys. Refining. Betts..... 231
 —with bismuth. Hiorns..... 396
 —Muntz metal. Analysis..... 91
 —Brasses. Guillet..... 157
 —Deposition of brass. Jacobs..... 250
 —Cooperative analysis of copper slag. Smith..... 413
 —Structure of electrolytic. Addicks..... *267
 —Boxeres de Alzugaray. Addicks..... 299
 —Huntington..... 470

INDEX.

V

—Effect of impurities on conductivity.	314
—Addicks	314
—Blast furnaces for copper smelting.	442
—Allis-Chalmers Co. (S.)	353
